AGENDA

1. **Welcome and Level Setting..... IDPH**
2. **Facilitated Discussion Facilitators and Committee Members**
 - a. Is this an accurate definition of a screening (as distinct from other, more involved evaluations)? If not, what should be changed or added?

A screening is defined as a brief procedure used to determine the probability of the presence of a problem, substantiate that there is a reason for concern, or identify the need for further evaluation.
 - b. What are the parameters that we should consider including to ensure clarity and feasibility for implementation of the new screening requirements across settings, geographies, and populations?
 - c. It is our intent to define the criteria that we will use to select validated tools for a list that will be created, updated, and disseminated periodically by IDPH. To that end, what criteria should we consider using to develop a list that is inclusive of basic and more advanced screening tools?
 - d. What are the primary concerns regarding implementation of the screening requirements and do you have suggestions about guidance in these areas (if we are legally in a position to do so)?
 - e. What other key terms must be defined in the regulations to ensure clarity for implementation?
3. **Public Comment Public Attendees**
4. **Closing / Next Steps..... Facilitators/IDPH.**
