Based on observation, record review, and interview the facility failed to implement new fall interventions after a fall, initiate neurological checks and timely report and investigate a fall for two of three residents (R1 and R2) reviewed for falls in a sample of three. This resulted in R1 sustaining a subsequent fall on 10/21/16 and resulted in R1 sustaining a "Parasymphysis and Rami fracture of the pelvis on 10/20/16.

Findings include:

The Facility's Fall Procedure Policy dated 6/8/15 documents: "(The facility) provides interventions to reduce risk factors for falling...each shift is to assess the resident: 72 hour post event assessment including neurological checks if a head injury occurred or is suspected."

1. The Facility's August, September and October 2016 Incident logs did not document any falls had occurred for R1.

R1's electronic medical record documents R1 was admitted to the facility on 12/16/10 and expired on 10/21/16.

R1's MDS (Minimum Data Set) dated 8/15/16 section B, documents R1 has "unclear
speech-slurred mumbled words." The same MDS documents under section C that R1 demonstrates the following behaviors that are present and fluctuate: inattention, disorganized thinking, altered level of consciousness and psychomotor retardation. This same MDS documents under section G: R1 walks in room with supervision and 1 person physical assist.

R1's current electronic care plan documents "(R1) is at risk for falls r/t (related to) unaware of safety needs, confusion, poor communication/comprehension."

R1's Accident/Incident Report dated 10/7/16 and completed by E3 LPN (Licensed Practical Nurse) documents R1 sustained an unobserved fall on 10/7/16 at 3:30 a.m. R1 "was on bedroom floor fitting in between bed and wc (wheelchair)...stated he did not hit his head when asked...neurochecks and vs (vital signs) within normal limits...A & O (alert and oriented) x1...refer to Ortho (orthopedics)..." The same form documents R1 is memory impaired and "decision making impaired." The same form documents R1 had 1 other fall in the past 30 days. The facility was unable to provide an incident report for R1's fall that occurred 30 days prior. R1's electronic medical record documents a Morse Fall Scale was completed on 9/7/16 at 4:10 a.m. for post fall. The facility was unable to provide documentation for a fall investigation from 9/7/16. Administrative Investigation Notes dated 10/7/16 document on 10/9/16 and 10/10/16 (R1) observed ambulating with unsteady gait and a limp. R1's electronic medical record documented an order on 10/7/16" "ortho consult for difficulty walking, limping..." R1's Consultation Report dated 10/20/16 documents: "reason for visit, hip/pelvic pain, parasympysis fx/Rami fx

(fracture.)"

R1 sustained another unobserved fall on 10/21/16 at 3:30 a.m. R1's Accident/Incident Report completed by E3 LPN documents: (R1) was sitting on floor between bed and w/c. A & O (alert and oriented) x 1, Neuro checks in normal limits, able to move all extremities equal. No injury noted...Recommended to prevent occurrence: (R1) expired 0530 (5:30 a.m.)."

R1's electronic medical record did not document Neurological checks were completed for the falls on 10/7/16 or 10/21/16.

R1's electronic progress notes document a late entry with a created date of 10/12/16 for the fall of 10/7/16 written by E3 LPN that documents: "Neuro checks within normal limits...no injury noted." R1's electronic medical record contains another late entry by E3 LPN. The Late entry was created on 10/21/16 at 8:03 a.m. (after R1's death occurred at 5:30 a.m.) regarding R1's 10/7/16 fall and documents: "continues FVS (fall vital signs), Neuro checks within normal limits...no injury."
