This Requirement was not met:

Based on observation and interview, the facility failed to maintain proper infection control technique in 1 of 5 residents (R3) in the sample of 5 who were reviewed for infection control.

An observation was made of incontinence care being performed on R3 on 5/24/16 at 1:35 PM by E3 VNAC (Veterans Nurses Assistant Certified) and E4 VNAC. E3 positioned and dispensed the perineal cleanser to E4 who completed the incontinence care to genital and anus area. Upon completing the incontinence care, E4 maintained her same gloved hands used to perform the care and placed clean pads under R3, pulled up the side rail and placed the wipe container on the bedside stand. An interview with E2 DON (Director of Nursing) on 5/25/16 at 11:40 AM was conducted in which E2 acknowledged her expectation for staff would be to sanitize hands and change gloves after completing incontinence care and before touching other surfaces in the room.
