

COVID-19 Treatments

I just tested positive for COVID-19, are there treatments?

Yes, there are IV medications and oral pills that can be used to treat COVID-19. Talk with a health care provider ***as soon as possible*** to see if you are eligible for one of these treatments. You will need a prescription to get the treatment.

These treatments are free to you, but your insurance may be billed.

Once you have a prescription, go to
<https://dph.illinois.gov/covid19/covid-19-outpatient-therapy-locator.html>
or call 1-800-889-3931 to find a pharmacy or health facility offering the treatment.
