UPDATE TO MARCH 10TH NOTICE

Dear Resident and/or Responsible Party,

The Illinois Department of Veterans' Affairs is required to provide updates to the notification that Pneumonia has been diagnosed in our facility pursuant to Public Act 100-0632 which was signed into law on July 27, 2018.

On April 3, 2020 one additional case of pneumonia was identified among the residents at the Illinois Veterans' Home at Anna. These cases of pneumonia are not clustered or in the same location.

It should be noted that respiratory illness is common in communal living settings and that not all pneumonia is caused by a communicable disease. Our Veteran residents' health and comfort are important to us and we are treating these with appropriate medication and comprehensive care.

Sincerely,

Angela Simmons
Administrator
