

LATINOS and HIV in Illinois

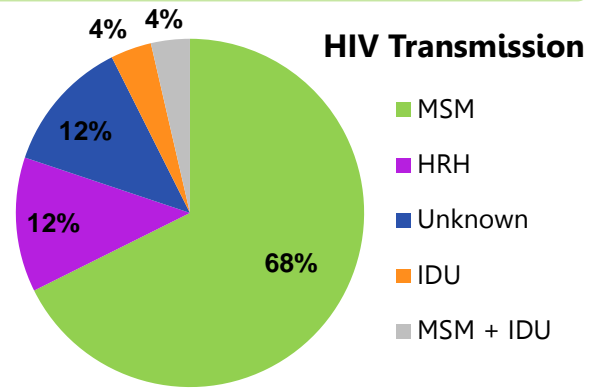

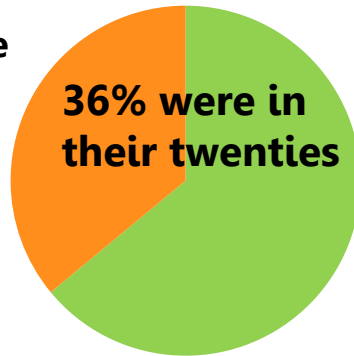

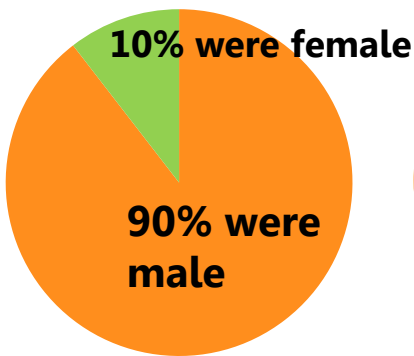

The Numbers:

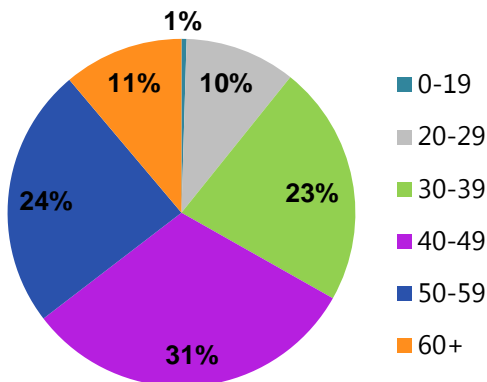

On average, one in five people diagnosed with HIV is Latino.

Among Latinos diagnosed with HIV in Illinois between 2010 and 2014:

Latinos Living with HIV by Age Group (as of 12/31/15)

Latino communities face barriers such as stigma around homosexuality and economic hardship that present challenges to HIV prevention.

Therefore, it is critical to get the facts about HIV and know your HIV status. Information and resources can be found at www.hivtest.org.
