

Scan of injury, violence, and suicide related-priority areas - including topics related to shared risk factors - chosen by local hospitals

Compilation of Hospital Community Health Needs Assessment (CHNA) (August 2020)

PURPOSE AND DISCLAIMER

This document aligns with the state plan and Illinois Partnership for Safety (IPS) goals of identifying Illinois health priorities, gaps in care, and their possible root causes of injury and violence. This scan of Community Health Needs Assessments serves a dual purpose.

First, the scan captures an at-a-glance summary of what local hospital needs assessments identified as their injury, violence, and suicide prevention priority areas, including topics related to shared risk factors. A companion document will be released focused on community assessments from local health departments. By identifying these community needs for prevention, this resource can be used as a tool for organizations to gain a better understanding of both community needs and potential priorities for service provision, prevention efforts, and technical assistance. In addition, this scan can help connect communities with similar priorities and promote local community engagement in statewide efforts.

The second purpose is to identify gaps in service and possible root causes of each priority area, including selected injury, violence, suicide, or related risk factors as a priority area.

This document focuses on the review of [local hospital community health needs assessments](#). The scan was a result of the Illinois Department of Public Health (IDPH) and Strengthening Chicago’s Youth at Ann and Robert H. Lurie Children’s Hospital of Chicago staff and interns organizing and compiling publicly available data into a single format for easier review across topics and counties. The information presented herein may not be a full representation of current needs in each community. The needs assessments reflect self-reporting that has limitations and further metrics are needed to support initial responses. The content of the scan is intended to be used for informational purposes only. Readers are encouraged to verify the accuracy of all information presented as IDPH will not be liable for any error, misinformation, or the resultant consequences.

LIST OF INJURY, VIOLENCE, AND SUICIDE RELATED-PRIORITY AREAS - INCLUDING TOPICS RELATED TO SHARED RISK FACTORS - CHOSEN BY LOCAL HOSPITALS.

The list also includes an outline of the gaps in care and possible root causes in the communities associated with each priority area. (See county-level information starting on page 15.)

1. Priority: Alcohol abuse

[Back to Table of Contents](#)

(County: Logan)

- Gaps in care
 - Health provider shortage areas (4)
 - Lack of providers
 - No federally qualified health centers
- Possible root causes
 - Adults who drink excessively
 - Alcohol-impaired driving deaths
 - Children in poverty
 - Low median income
 - Mental health and substance use related deaths
 - Percent single-parent homes – Adverse Childhood Experiences (ACEs)
 - Unemployment rate

2. Priority: Behavioral Health

[Back to Table of Contents](#)

(Counties: Cook, DuPage, Lake, Logan, McHenry, McLean)

- Gaps in service
 - Cost of care/health insurance
 - Coordination and linkage to services
 - Data collection and sharing strategies
 - Financial/health insurance barriers
 - Health provider shortage areas
 - Health professional shortage area (entire county)
 - Lack/shortage of providers (2)
 - Lack of inpatient facilities
 - Limited resources (2)
 - Need for community services and resources
 - No inpatient psychiatric services within 30-mile radius
 - No practicing psychiatrist in county
 - On-site psychiatrist
 - Policy, education, empowerment
 - Population living in health professional shortage areas
 - Ratio of providers to population
 - Shortage of providers (especially in schools)
 - Uninsured population (3)
 - Youth and adult prevention programs
- Possible root causes
 - Reduce stigma related to seeking treatment
 - Percentage single-parent homes – ACEs
 - Children in/living in poverty (2)
 - Adults drinking excessively (5)
 - Teens using alcohol (2)
 - Significant increase in deaths due to heroin and fentanyl
 - Adolescents contemplating suicide (2)
 - Drug-induced deaths
 - Low median income/low median household income (3)
 - Population/percentage population living below 100% federal poverty level (FPL) (2)
 - Adults who smoke
 - Substance use in adolescents
 - Depression in Medicare population (2)
 - Unemployment rate (2)
 - Population living below 100% FPL
 - Population with low food access
 - Alleged victims of child abuse and neglect
 - Single-parent households in poverty
 - Food insecurity
 - Alcohol-impaired driving deaths
 - Discrimination
 - Mental health hospitalizations
 - Suicide death rate
 - Individuals living in poverty

- Drug-induced mortality rate
- Depression in adolescents
- Fear surrounding potential deportation and family separation
- Adults who binge drink
- Teens driving and using alcohol or drugs
- Teens using marijuana
- Opioid death rate increase

3. Priority: Child Maltreatment
(County: Cook)

[Back to Table of Contents](#)

- No identified gaps in care
- Possible root causes
 - Growing opioid crisis

4. Priority: Community Safety
(County: Cook)

[Back to Table of Contents](#)

- No identified gap in care
- Possible root causes
 - Unemployment rate (2)
 - Violent crime rate (2)
 - Population with low food access
 - Low median income
 - Individuals living in poverty

5. Priority: Homelessness
(Counties: Cook, Kane, Lake, McHenry, Will)

[Back to Table of Contents](#)

- Gaps in care
 - Build and sustain a shelter (6)
- Possible root causes
 - Low median income (10)
 - Children in/ living in poverty (7)
 - Population living below 100% FPL (7)
 - Unemployment rate (5)
 - Disabled population (6)
 - Percent single-parent homes – ACEs (2)
 - Youth (16-19) not in school and not working (6)

6. Priority: Injury
(Counties: Cook, Madison)

[Back to Table of Contents](#)

- Gaps in care
 - Poor access to health services
- Possible root causes
 - Population living below 100% FPL
 - Unemployment rate
 - Education inequity
 - Mass incarceration
 - Differential policing strategies
 - Generational trauma
 - Segregation and racism
 - Unintentional injuries as cause of death among children
 - Violence disproportionately affecting low-income communities of color

7. Priority: Injury and Violence

(Counties: DuPage, Madison, Will)

[Back to Table of Contents](#)

- Gaps in care
 - Uninsured population
- Possible root causes
 - Fallen asleep while driving (worsening trend)
 - Fire-arm related deaths (worsening trend)
 - Victim domestic violence (worsening trend)
 - Population living below 100% FPL
 - Fire-arm related deaths
 - Homicide rate (2)
 - Violent crime rate (2)
 - Domestic violence
 - Gang violence
 - Trauma
 - Population in poverty
 - Fire-arm related deaths
 - Rate of drinking and driving
 - Illicit drug use

8. Priority: Isolation

(Counties: Champaign, Cook, Madison, Vermilion)

[Back to Table of Contents](#)

- No Identified gap in care
- Possible root causes
 - Children living in poverty (4)
 - Population living below 100% FPL (3)
 - Unemployment rate (2)
 - Disabled population (6)
 - Percentage single-parent homes – ACES (2)
 - Youth (16-19) not in school and not working (3)

9. Priority: Mental Health

(Counties: Bureau, Clark, Clay, Clinton, Coles, Cook, Crawford, Cumberland, Douglas, DuPage, Edgar, Edwards, Effingham, Ford, Franklin, Fulton, Hardin, Iroquois, Jasper, Jersey, Kankakee, La Salle, Lawrence, Lee, Macon, Macoupin, Madison, McHenry, Mercer, Montgomery, Perry, Piatt, Pike, Putnam, Richland, Saline, Sangamon, Shelby, St. Clair, Stephenson, Vermilion, Wabash, Wayne, Will)

[Back to Table of Contents](#)

- Gaps in care
 - Lack of providers/ health professional shortage/shortage of providers (45)
 - Lack of available treatment types
 - Mental health of Blacks or African Americans (2)
 - Mental health of American Indians or Alaska natives (2)
 - Demand for mental health care
 - Mental health of ages 18-35
 - Pediatric mental health
 - Lack of access to care, no insurance/coverage
- Possible root causes
 - Adolescent suicide and intentional self-inflicted injury
 - High percentage of people living below poverty level
 - Percentage of families with children living below poverty level
 - Percentage single-parent homes- ACEs (4)
 - Stigma related to seeking help or accessing mental/behavioral care (4)
 - Families with children living below poverty line level (3)
 - Significantly increasing age-adjusted death rate due to suicide (2)

- Lack of youth mental health care (2)
- Emergency department (ED) rates for African Americans due to mental health (2)
- Adult and pediatric ED rates due to mental health (2)
- Increase in ED and hospitalization rates due to mental health
- Need for community services and resources
- Uninsured population (8)
- Fragmentation within the system of providers (2)
- Provider availability
- Rate of hospitalization due to mental health
- Rate of hospitalization due to suicide/self-inflicted injury
- Lack of resources
- Youths with mental health conditions not receiving care
- Quality concerns
- Inadequate reimbursement
- Access to all services (especially for youth) (5)
- Better information about available services and resources (5)
- Local access to a psychiatrist/access to psychiatrists (11)
- Access to outpatient services, including counseling (5)
- Access to inpatient care (especially for Medicaid recipients) (5)
- Transportation (5)
- After hour and weekend access to care (5)
- Access to case managers (5)
- Issues with services within and outside of hospital
- Access to local outpatient services: screening, assessment, counseling for all ages
- Access to local and improved access to distant inpatient mental health care
- Access to care (5)
- Availability/lack of treatment beds (2)
- Improved access to local services
- Significantly increasing rate of depression in the Medicare population
- Significantly increasing rate of depression
- Unemployment/unemployment rate (47)
- Percentage single-parent homes - ACEs (10)
- Self-report of poor emotional and mental health
- Increase in deaths due to suicides
- Development of treatment centers met with resistance by residents
- Stigma towards people suffering
- High level of stress
- Stigma related to/ towards people seeking care (2)
- Adults and children in poverty
- Veteran population (4)
- Suicide as a significant cause of death
- Low graduation rate (3)
- Children living in poverty (7)
- Depression in Medicare population (8)
- Population/percentage population with low food access (13)
- Low median (household) income (48)
- Adults and children in poverty
- Percentage of families living below the poverty level
- Population living below 100% FPL (34)
- Exposure to violence
- Poor housing conditions
- Segregation and racism
- Percentage people living below the poverty level
- Children/percentage children living in poverty (24)
- Percentage depression in Medicare population
- Death rate for suicide (15)
- Significant percent of population with high level of stress
- Percentage adults without primary care providers
- Disabled population (21)
- Youth (16-19) not in school and not working (9)
- Adolescents experiencing depression
- Adolescents engaging in self-harm
- Violent crime rate
- Medicare population with depression (2)
- Mortality rate from suicide and self-inflicted injury (2)
- Adolescent mental health
- Address culture of poverty in local communities
- Anxiety disorders in seniors and youth
- Mental health and substance use related deaths

- Local access to medication/assisted treatment for substance abuse (2)
- No federally qualified health centers
- Access to local counselling for youth
- Access to referrals to local outpatient services (2)
- Access to post-care services for persons returning from inpatient care (2)
- Community education to support awareness and reduce stigma of seeking care (2)
- Local access to medication/assisted treatment
- Resources to address suicide
- Local access to providers at all levels
- Local support services
- Local access to detoxification, rehabilitation, and recovery for substance abuse disorders
- Inpatient services for behavioral health
- Information about access to services
- Access to referrals
- Prevention education
- Access to services (12)
- Community education (6)
- Percent insured under 18
- Unified, county-wide process for intake and post-intake handling of criminal and non-criminal mental health needs
- Larger collaborative to expand services
- Improved access to services for youth and families
- Need for substance use/misuse/abuse prevention and recovery services - particularly smoking
- Lack of affordable services (3)
- Services for persons facing co-occurring mental health and substance use disorders
- Licensed clinical social worker
- Address suicide ideation
- Geriatric outpatient psych services
- Provide community with more and better information about mental health services
- Cost preventing physician visit
- Education on mental health (2)
- Self-harm and interpersonal violence related deaths
- Percentage of people who are caregiver to friend/family members
- Percentage population/population with chronic depression symptoms (2)
- Percentage population with "extremely/very" stressful typical day
- Persons/population living below 200% FPL (2)
- Low access to healthy food (2)
- Children under 18 in poverty
- Reported frequent mental distress
- Adults who drink excessively
- Poor mental health among low-income individuals
- Rate of people taking medication or receiving mental health treatment (2)
- Parents rating children with "poor" mental health
- Age-adjusted suicide rate (4)
- Persons in poverty (2)
- Structural racism preventing quality care (2)
- Food insecurity (2)
- Adults who binge drink
- Prevalence of violence
- Individuals/families living in poverty
- Self-report of depression and anxiety (4)
- Increase in self-report of "poor" overall mental health (5)
- Elderly population (2)
- Reporting "embarrassment" as reason to not seek counseling (3)
- Increase in rate of poverty
- Population/percent population living in poverty (9)
- Homicide rate
- Youth substance use
- Suicide deaths (4)
- Population/percentage of individuals with diagnosed depression (3)
- Self-report of "poor" mental health (worsening trend) (2)
- Population without high school diploma or GED
- Increase in illicit drug use (2)
- Increase in opioid-related deaths (2)
- Self-report of mentally unhealthy days
- Families in poverty (3)
- Fire-arm related deaths
- Homicide rate
- Violent crime rate

- Out of pocket deductibles
- Need for mental health to be considered and prioritized by medical professionals when addressing an individual's health
- Cost preventing physician visit (5)
- Lack of providers (especially Medicaid) (6)
- Access to care for uninsured population
- Lack of access to care (reported more by Hispanic individuals)
- Difficult to access treatment
- Inadequate outpatient services for adults
- Limited inpatient services for children and adolescents
- Lack of mental health education
- Lack of understanding how to access existing services
- Timely linkage to appropriate care
- Resources, referrals, coordination, and connection to community-based services
- Could not afford copay (2)
- No insurance/doctor refused insurance
- No insurance/could not afford copay
- Urgent care as primary source of care (2)
- Access to behavioral health counselling (4)
- Disparities in uninsured population among race and ethnicity (Black and Hispanic/Latino most uninsured)
- Increased coordination and access to services
- Ratio of providers to population
- Lack of providers and services
- Services in schools (5)
- Services for farmers (5)
- Services for those with Medicaid, Medicare, underinsured, or uninsured (5)
- Access to inpatient care (5)
- Access to care due to appointments/hours
- Lack of knowledge on services available (2)
- Lack of services
- Cost of services
- Health professional shortage area (entire county) (4)
- Lack of consistent options
- Elderly population (3)
- Drug overdose death rate (2)
- Poor availability of services

- High volumes ED use for routine and crisis care (3)
- Screening and referrals (3)
- Suicide prevention programs (2)
- Lack of licensed professional
- Education on local mental health needs (4)
- Cost of care
- ED use due to difficulty accessing care
- Local services rated as "fair"/"poor"

10. Priority: Parenting

(Counties: Grundy, Kendall, La Salle, Will)

[Back to Table of Contents](#)

- Gaps in care
 - Family education (6)
- Possible root cause
 - Teen births (3)
 - Percentage single-parent homes – ACEs (2)
 - Student reading proficiency (4th grade) (5)
 - Youth (16-19) not in school and not working (3)

11. Priority: Poverty

(Counties: Cook, Will)

[Back to Table of Contents](#)

- No identified gap in care
- Possible root causes
 - Low median income (2)
 - Families in poverty
 - Unemployment rate (4)
 - Population in/living in poverty (2)
 - Children in/living in poverty (2)
 - Violent crime rate
 - Individuals diagnosed with depression

12. Priority: Socio-structural determinants of health

(County: Cook)

[Back to Table of Contents](#)

- No identified gap in care
- Possible root cause
 - Population living below 200% FPL
 - Percent population with no high school diploma or equivalent

13. Priority: Substance Abuse

(Counties: Boone, Bureau, Calhoun, Christian, Coles, Cook, DeKalb, DuPage, Fayette, Greene, Henry, Jackson, Jefferson, Kane, Kankakee, Kendall, Knox, Lake, La Salle, Lee, Livingston, Macoupin, Madison, Marion, Marshall, McHenry, Montgomery, Morgan, Ogle, Peoria, Putnam, Scott, Shelby, Tazewell, Warren, Williamson, Winnebago, Woodford)

[Back to Table of Contents](#)

- Gaps in care
 - Hospitalization of adults due to alcohol abuse
- Possible root causes
 - Alcohol-impaired/involved driving deaths (12)
 - Adults who drink excessively (17)

- Hospitalization due to alcohol/substance use
- Hospitalization rates due to substance use (highest in 18-24) (2)
- Hospitalization due to opioid use
- ED rates for adult alcohol use (2)
- Uninsured population (8)
- Fragmentation within the system of providers (2)
- Shortage/lack of providers (4)
- Rate of hospitalization due to substance abuse
- Access to prevention, treatment, and recovery resources (5)
- Access to case managers (5)
- Transportation (5)
- After hour and weekend access to care (5)
- Address substance abuse through expanded prevention education at young ages
- Detoxification services
- No federally qualified health centers (2)
- Health professional shortage area(s) (3)
- Health professional shortage area (entire county) (7)
- Detoxification, rehabilitation, and recovery services (6)
- Prevention efforts directed to methamphetamines and prescription drugs (6)
- ED visits related to substance abuse
- Lack of affordable services (3)
- Services for persons facing co-occurring mental health and substance use disorders
- Address abuse of prescription drugs resulting from pain management and genetic disposition
- Expand prevention and awareness efforts around marijuana, cocaine,
- Percentage single-parent homes/households – ACEs (11)
- Teens using alcohol (10)
- Teens using marijuana (8)
- Increase in deaths due to heroin and fentanyl (2)
- Teen vaping (2)
- Families with children living below the poverty line
- Increasing use of substances and alcohol (2)
- Adolescent alcohol use (4)
- Drug overdose deaths significantly increasing (3)
- Teens using e-cigarettes (3)
- Population/percentage population living below 100% FPL (30)
- Unemployment rate/unemployment (40)
- Exposure to violence
- Segregation and racism
- Drug overdose deaths, most heroin related
- Heavy alcohol consumption in adults
- Development for treatment centers met with resistance by residents
- Stigma towards people suffering
- Prevalent overprescribing of opioids
- Risky behavior in youth
- Easy access to drugs and alcohol
- Adults and children in poverty
- Veteran population (4)
- Adults and teens who smoke
- Significant increase in drug and heroin overdose deaths
- Low graduation rate (3)
- Children in/living in poverty (27)
- Population with low food access (2)
- Percentage children living in poverty
- Low median income/low median household income (49)
- Tobacco use
- Youth (16-19) not in school and not working (8)
- Opioid dependency/abuse
- Adults who smoke/adults who smoke daily (7)
- Violent crime rate (3)
- Depression in Medicare population
- Adolescent substance use/adolescent using substances (3)
- Significant rise in naloxone use
- Increase in deaths due to drug overdose
- Non-fatal opioid overdose
- Adults who binge drink (2)
- Adolescent who smoke (2)
- Rise of opioids
- Heroin-related overdose deaths (2)
- Alcohol and drug abuse among youth (2)

- alcohol, methamphetamines, opioids, and nicotine
- Cost preventing physician visit (6)
- Population living in health professional shortage areas
- Coordination and linkage to services
- Data collection and sharing strategies
- Ratio of providers to population
- Policy, education, empowerment
- Education for youth (2)
- No crisis detox services
- Shortage of treatment centers
- Services not equally available - income based
- Collaboration between hospitals and treatment centers
- Limited access to services
- Lack of providers (especially Medicaid) (2)
- Access to care for uninsured population
- Education
- Cost of care/health insurance (2)
- Difficult to access treatment
- Need more treatment/recovery homes
- Lack of understanding on how to access existing services
- Could not afford copay (2)
- No insurance/doctor refused insurance
- No insurance/could not afford copay
- Urgent care as primary source of care (2)
- Access to behavioral health counseling (4)
- Access to local services (4)
- Medication-assisted treatment for persons with opioid use disorders (4)
- Disparities in uninsured population among race and
 - Alcohol and drug abuse among adults (2)
 - Drug overdose deaths/death rate (6)
 - Mental health and substance use related deaths
 - Percent population with chronic depression symptoms
 - Percent population with "extremely/very" stressful typical day
 - Drinking and driving in last month
 - Population living below 200% FPL
 - Youth using substances/youth substance abuse (6)
 - Drinking and driving deaths
 - Deaths from drug poisoning (2)
 - Physician education - limit inappropriate prescriptions
 - Children under 18 in poverty
 - Individuals/families living in poverty (5)
 - ED visits and hospitalizations due to nicotine dependence
 - ED visits due to drug poisoning (2)
 - Teens using nicotine (2)
 - Hospitalizations due to nicotine dependence
 - Teens using drugs/alcohol and driving
 - Opioids and heroin addiction
 - Poor mental health among low-income individuals
 - Rate of people taking medication or receiving mental health treatment (2)
 - Rate of illicit drug use (3)
 - Rate of drinking and driving (5)
 - Ease of access to opioids
 - Parents rating children with "poor" mental health
 - Deaths from cirrhosis/liver disease
 - Ease of getting alcohol and drugs
 - Single-parent households in poverty
 - Food insecurity
 - Self-report of depression/anxiety (3)
 - Increase in self-report of "poor" overall mental health (3)
 - Reporting "embarrassment" as reason to not seek counseling (2)
 - Increase in rate of poverty
 - Rate of suicide (3)
 - Homicide rate (2)
 - Illegal substance use in adolescents
 - At risk for binge drinking (3)
 - Percentage of individuals who binge drink
 - Adults at risk for binge drinking
 - Opioid overdose death rate ages 15-64
 - Population without high school diploma or GED
 - Increase in illicit drug use (2)
 - Increase in opioid-related deaths (2)
 - Percent population in poverty
 - Rate age-adjusted overdose deaths (3)

- ethnicity (Black and Hispanic/Latino most uninsured)
- Increase education, coordination, and access to services
- Access to services (3)
- Local access to detoxification (5)
- Prevention education and programming for youth (5)
- Access to care due to appointments/hours
- Mental health/wellness services
- Addiction services
- Access to services for residents outside the city
- Care for low income/uninsured
- Lack of knowledge of services available (2)
- Screenings and referrals (3)
- Lack of services (2)
- High costs of care (2)
- Difficulty of Medicaid acceptance (2)
- Providers not accepting Medicaid
- Lack of treatment options
- Lack of tobacco prevention and cessation programs
- Access to mental health care (4)
- Promote prevention (4)
- Provide education to community and schools (4)
- ED use due to difficulty accessing care
- Local services rated as "fair"/"poor"
- Population in/living in poverty (8)
- Teens using substances (4)
- Depression in Medicare population (2)
- Non-fatal opioid overdose rate (4)
- Fatal opioid overdose rate
- Increase in drug-related hospitalizations (2)
- Rate of child abuse and neglect
- Fire-arm related deaths
- Individuals diagnosed with depression
- Population with diagnosed depression
- Poor availability of services
- Drug-related deaths
- Unintentional drug-induced death rate

14. Priority: Trauma awareness and prevention
(County: Edwards)

[Back to Table of Contents](#)

- Gaps in care
 - Disparities in uninsured population among race and ethnicity (Black and Hispanic/Latino most uninsured)
 - Increase crime prevention and trainings to address bullying
 - Address crime related to substance abuse and mental health
- Possible root causes
 - Homicide rate
 - Youth experiencing bullying

15. Priority: Violence

(County: Wabash)

[Back to Table of Contents](#)

- Gaps in care
 - Increasing community engagement
 - Promoting police-community relations
- Possible root causes
 - Percentage single-parent homes - ACEs
 - Reduced investment in communities
 - Rate of violent crime
 - Children in poverty
 - Working with abuse victims

16. Priority: Violence and Community safety

(County: White)

[Back to Table of Contents](#)

- Gaps in care
 - Resources, referrals, coordination, and connection to community-based services
- Possible root causes
 - Persons below 200% FPL
 - Children under 18 in poverty
 - Low median income
 - Unemployment
 - Crude death rate from homicide
 - Persons in poverty
 - Unemployment rate
 - Food Insecurity
 - Adults who binge drink

CHNA grouping by county

1. Adams County
