

# Illinois Trauma Registry

## Corporate Report Release Notes

Issue Date March 14, 2007

### REPORT NAME: PLACE OF INJURY

#### Report Purpose—

The report displays place of injury Ecode count totals for home, farm, mine and quarry, recreational/sport, street/highway, public building, residential institution, other specified place, and unspecified place categories, as well as school-related and work-related breakdowns for each of these categories. A count for patient records for which no injury site is recorded is also displayed.

Site of Injury			SCHOOL RELATED					WORK RELATED				
	# Rec	%	YES	NO	UNK	NA	Empty	YES	NO	UNK	NA	Empty
No site entered												
Home												
Farm												
Mine and quarry												
Industrial places/premises												
Place for recreation/sports												
Street/highway												
Public building												
Residential institution												
Other specified place												
Unspecified place												
Totals												

#### Report Content—

Within the range of user-defined selection criteria, the report counts the number of patient records with Ecodes ranging from 849.0 through 849.9, which correspond to the place of injury categories "Home" through "Unspecified place," respectively, as listed in the table immediately above. School and work related information is also based on entries made to the patient records.
