S9999	<p>Continued From page 18 affect all 56 residents in the facility.</p> <p>Findings include:</p> <p>Facility Assessment not dated documents: Infection prevention and control: identification and containment, prevention of infections. Training and Competencies: Infection control-a facility must include as part of its infection prevention and control program mandatory training that includes the written standards, policies, and procedures for the program.</p> <p>On 6/14/25 at 8:22am a black flaky substance was observed inside the ventilation hood above the cooking stove. Upon touching a flake, it immediately fell off onto the cooking area of the stove. Inspection certificate documents that the ventilation hood was last inspected on 1/13/25 by a private industrial cleaning company.</p> <p>On 6/14/25 at 8:25am V6 Dietary Manager stated that V6 started working at the facility on 6/2/25. V2 stated that the black flaky substance inside the ventilation hood above the stove has been there since V6 started working. V6 stated that V6 informed V1 Administrator and a private company is scheduled to come inspect it on 6/23/25 at 6:30pm. V6 stated that it is a concern if the flakes come off and fall into the residents food. V6 stated that if the flakes get into a residents food they could get sick. V6 confirmed that when the flakes are touched, they fall off onto the cooking area. V6 stated that the vent should be inspected more often and cleaned so that this black flaky substance gets removed and never has the potential to form again through better maintenance.</p> <p>(C)</p>	S9999
