People aged 50-80 and in fairly good health.

Current smokers or people who smoked in the last 15 years.

A smoking history of at least 20-pack-years.

Lung cancer screening is available, and it can help detect cancers early when they are easier to treat.

Studies show that screening could improve survival by 20%.

The Illinois State Cancer Registry is funded in whole or in part with federal funds from the National Cancer Institute, National Institutes of Health, U.S. Department of Health and Human Services, under Contract No. 75N91021D00006, the National Program of Cancer Registries, Centers for Disease Control and Prevention under cooperative agreement 1NU58DP007162-01-00, and the state of Illinois. The findings and conclusions are those of the Illinois State Cancer Registry and do not necessarily represent the official position of the Centers for Disease Control and Prevention or the National Cancer Institute.
